EU NOVEL FOOD Statement UPDATES 2019/ 2020

About HEMP

In the European Union, the cultivation of Cannabis sativa L varieties (HEMP) is granted provided they are registered in the EU's 'Common Catalogue of Varieties of Agricultural Plant Species' and the tetrahydrocannabinol (THC) content does not exceed 0.2 % of the plant. Without prejudice to other legal requirements concerning the consumption of hemp (Cannabis sativa) and hemp products, Regulation (EU) 2015/2283 on novel foods is not applicable to most foods and food ingredients from this plant".

Update about CBD

Extracts of Hemp in which cannabidiol (CBD) levels are higher than the CBD levels in the source are novel in food. Our supplier uses first pressing methods that respect the cannabinoid potency of the plant material. The CBD levels in the base extracts are always below the CBD levels in the plant material.

Update CANNABINOIDS 2020

CBD is now removed from the EU NOVEL catalogue. From now on CANNABINOIDS are novel in food according to the NOVELL catalogue. Since there is plenty proof of use of cannabinoids in food prior to 1997, the listing is false. The NOVEL catalogue is not only a guideline, the listing of cannabinoids is unjustified too. Besides, there is plenty of proof of consumption of hemp prior to 1997. Therefore the Novel Food rules do not apply.
